

# Switch off your geyser between 5pm and 9pm. *Here's why:*

The reason we ask you to switch off your geyser between 5pm and 9pm, is that the country uses more electricity during this time and supply is under severe pressure. Switching off your geyser helps free up power for other things and relieves the pressure on the grid.

Here's an interesting fact, the huge demand for energy during the evening between 5pm and 9pm is the equivalent of one power station. There is an estimated 5,4 million electric geysers in homes across South Africa.

Our combined contribution makes a significant difference. Switch off your geyser every day between 5pm and 9pm, and help us beat the peak to keep South Africa powered up.

# Skakel jou geiser af tussen 5nm en 9nm. *Hoekom?*

Tussen 5nm en 9nm, is die vraag na elektrisiteit op sy hoogste in Suid-Afrika. Deur jou geiser af te skakel, help jy om die druk op die nasionale kragnetwerk te verlig en krag vir ander doeleindes beskikbaar te stel.

Hier is 'n interessante feit, die enorme vraag na elektrisiteit saans tussen 5nm en 9nm is gelyk aan die krag wat een kragstasie opwek. Daar is ongeveer 5,4 miljoen elektriese geisers in huise regdeur Suid-Afrika.

Ons gesamentlike bydrae maak 'n betekenisvolle verskil. Skakel jou geiser elke dag tussen 5nm en 9nm af en help ons om die spitsverbruik te beheer en Suid-Afrika se kragnetwerk stabiel te hou.
